

MOXi

MOXi is our new high-quality 2 channel acoustic instrument preamp, EQ and DI. Claiming the new sweetspot of our pedal lineup, MOXi delivers all of the legendary audio performance as its big brother FELiX, but with a more approachable feature set similar to the BiX. For players who need 2 channels of incredible sounding preamp and EQ, but maybe not quite the kitchen sink, MOXi is just right.

- 2 beautiful, musical sounding instrument preamps
- Blending / MIX or A-B output operation
- XLR DI output with high-quality output transformer
- Line level 1/4" stage amp output
- FX loop with individual send and return
- Independent 3 band EQ on both channels
- 75Hz high pass filter on both channels
- A - B footswitch for multiple instrument setups
- Mute/ Tune footswitch mutes all outputs except FX send
- Boost footswitch for variable 10dB level boost
- Rear panel switch for Boost defeat on ch1
- 12V mic bias power available on both 1/4" inputs
- Phase reverse switch for each channel
- 1MEG Ohm input impedance on both channels
- 9VDC 150mA operation
- Full 5 year transferable warranty
- Designed and built by us in Lyons, CO, USA
